EDUCATION

Washington State University

Master of Science, Computer Science | GPA: 3.93 / 4.00

Pullman, WA

Jan 2024 - May 2025

Relevant Coursework: Artificial Intelligence, Advanced Algorithms, Computer Vision, Data Science, Machine Learning, Neural Network, Reinforcement Learning, Software Design & Architecture, Web Security

Sastra University

Bachelor of Technology, Computer Science Engineering | GPA: 7.55 / 10.00

Tanjore, India

Jun 2017 - May 2021

SKILLS & CERTIFICATIONS

Programming: Python, Java, R

Databases & Visualizations: Snowflake, SQL, MySQL, KQL, Teradata SQL, MongoDB

Cloud Technologies & Development Practices: Azure, Azure Devops, GCP, Data Pipelines, ETL

Libraries/Tools: Airflow, Docker, Excel, Git, GitHub, Hadoop, M365, ServiceNow, Spark, Tableau, Power BI

Certifications: SnowPro Associate (Snowflake) · GitHub Foundations · Infosys Certified (Snowflake & Data Warehouse Developer, Spark Professional, Database & SQL Associate, BI Associate) · Architecting with Google Compute Engine · Postman API Fundamentals

WORK EXPERIENCE

Software Engineer

Quadrant Technologies LLC

Redmond, WA

July 2025 – Present

- Contributed to Microsoft DevOps projects optimizing PostgreSQL High Availability (HA) servers by implementing Kusto Query Language (KQL) scripts and a Copilot Studio agent with Graph Connectors for automated diagnostics and technical issue resolution.
- Led development of an AI-driven Employee Management & Learning Hub (Django, Azure App Services), integrating HR, IT, and Asset modules used by 200+ employees and built custom Power BI dashboards embedded in the web app to visualize employee statistics for real-time insights to HR.
- Delivered an MVP to speed the process of dashboard conversion solution adopted by internal business stakeholders for pilot testing.

Student Success Advisor, Instructor

Office of Academic Engagement, Washington State University

Pullman, WA

Aug 2024 – May 2025

- Instructed UNIV 104 for 35+ undergraduates, improving engagement and performance through scheduled 1:1 mentorship sessions.

Data Engineer

Infosys Ltd - Client: Apple Inc

Bangalore, India

Sep 2021 - Dec 2023

- Migrated 500+ Teradata SQL stored procedures to Snowflake using Python automation and integrated Airflow for job orchestration.
- Optimized complex SQL queries through analysis and clustering, reducing data pipeline running time from hours to minutes.
- Built Selenium-based monitoring code reducing QA validation time by 2 hours daily and did data investigation for mismatching data.
- Designed Tableau dashboards for financial reporting and managed ServiceNow tickets to ensure 100% billing from Apple Inc.
- Contributed to open-source projects via GitHub during Hacktoberfest for 2 consecutive years.

Research Intern

National Institute of Technology

Trichy, India

May 2019 - Jun 2019

- Researched and simulated cache-based side-channel attacks, evaluating mitigation techniques across 3 systems in shared network.

PROJECTS

Tableau-to-Power BI Accelerator

(Aug 2025 – Oct 2025)

- Built a migration tool (Python, GPT-5) converting Tableau XML to Power BI (PBIP) JSON, cutting migration time by ~75%.

Elariis

(Jul 2025 – Sept 2025)

- Developed an internal web portal tool with a team of 6, featuring modules (Employee, HR & IT ticket management and learning hub) with BI dashboard and AI enhancements including RAG chatbot, training course recommenders and job matching with resume.

FlavorBlend

(Feb 2025)

- Collaborated in a team of 4 to develop FlavorBlend for hackathon, an AI-powered application that generates culturally blended recipes from 190+ countries using Llama 3 and diffusion models for text-to-image generation and integrated Firebase Authentication.

WhisperRx

(Mar 2025)

- Developed WhisperRx, an AI-driven web application that transcribes doctor-patient conversations into structured SOAP medical reports using Cloudflare Whisper and Llama 3 models, helping medical staff save 45% time in documentation.
- Engineered a user-friendly UI using HTML/CSS and JavaScript, leveraging prompt engineering, to complete the project in 3 days.

Neural Network-Driven Histopathological Tumor Classification

(Aug 2024 - Dec 2024)

- Built a hybrid InceptionV3-RNN model achieving 84% accuracy in adenoma vs. adenocarcinoma classification.

HACKATHONS, ACHIEVEMENTS & EXTRA CURRICULAR

- 1st Place - Quadrant Technologies Internship (Elariis Implementation)
- Best AI App & Best Growth Potential (Scholarship of \$2000) - Cloudflare + Coca-Cola ([CrimsonCode Hackathon 2025](#))
- Honorable Mention – [AgAID](#) Digital AgAth0n 2025 ([Snowpack Prediction Challenge](#))
